Recombinant Bone Morphogenetic Protein
Heterodimers, Compositions and Methods of Use.
                                                                                             Sequence 7. Application US/07989847

Sequence 7. Application US/07989847

Patent No. 586564

GENERAL INFORMATION:

APPLICANT: Israel, David

APPLICANT: Wolfman, Neil M.

TITLE OF INVENTION: Recombinant Bone Morphogenetic Prot

TITLE OF INVENTION: Heterodimers, Compositions and Meth

NUMBER OF SEQUENCES: 30

CORRESPONDENCE ADDRESS:

ATTORNEY/AGENT INFORMATION:
NAME: REPLEND., ELLEN J.
REGISTRATION NUMBER: 32,245
REFERENCE/DOCKET NUMBER: GI-5192B
TELECOMMUNICATION INFORMATION:
TELEPHONE: 617-876-1170
TELEPHONE: 617-876-5851
INFORMATION FOR SEQ ID NO: 7:
SEQUENCE CHARACTERISTICS:
LENGTH: 2923 base pairs
TYPE: nucleic acid
STRANDEDNESS: double

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Sequence 32, Application US/08459214
Sequence 32, Application US/08459214
Patent No. 5716810
GENERAL INFORMATION:
APPLICANT: Anthony J. Mason
APPLICANT: Peter H. Seeburg
TITLE OF INVENTION: Nucleic Acid Encoding the Alpha or
TITLE OF INVENTION: Beta Chains of Inhibin and Method for Synthesizing Polypeptide
TITLE OF INVENTION: Using such Nucleic Acid

transforming growth factor beta-1 precursor - bovine (fragment)
N;Alternate names: beta-TGF; cartilage-inducing factor-A; EGF-dependent TGF or dEGF;
C;Species: Bos primigenius taurus (cattle)
C;Date: 28-Feb-1992 #sequence_revision 28-Feb-1992 #text_change 16-Jul-1999
C;Accession: A40057; A42320; A05284; A24322; B61439
R;Van Obberghen-Schilling, E.; Kondalah, P.; Ludwig, R.L.; Sporn, M.B.; Baker, C.C.
Mol. Endocrinol. 1, 693-698, 1987
A;Title: Complementary deoxyribonucleic acid cloning of bovine transforming growth fa
A;Reference number: A40057; MUID:91042552
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   A; Molecule type: protein A; Molecule type: protein A; Molecule type: protein A; Residues: 204-209, X*, 211-217, XX', 220-232 <JIN>

Cicomment: This polypeptide is composed of two polypeptide chains cross-linked by dis C; Comment: Type II TGF does not bind to the EGF receptor and lacks intrinsic mitogenion. Cells grown in monolayer do not respond in a similar manner to these growth fact
A; Title: One of two subunits of masking protein in latent TGF-beta is a part of pro-T A; Reference number: $02267; MUID:89121078
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           A; Molecule type: protein
